

Mac OS X 10.5: Fonts list

Last Modified on: November 30, 2007

Article: 307069

Fonts included with Mac OS X 10.5 Leopard are installed in one of these folders:

- /Library/Fonts
- /System/Library/Fonts

You can turn a font on or off using [Font Book](#) to customize what fonts appear in an application's font menu, or in the Font panel. You don't normally need to worry about which Mac OS X 10.5 fonts you [turn off](#) or remove; any font that is required by the system, such as AquaKanaBold.otf, AquaKanaRegular.otf, Keyboard.dfont, LastResort.dfont, and Lucida Grande.dfont, cannot be disabled with Font Book.

However, some fonts that you can turn off (disable) may be required by specific applications. For example, Terminal relies on the [Monaco font](#) to function correctly.

The number of fonts installed by the Mac OS X Installer depends on which packages you selected (see the package details below) when you installed Mac OS X 10.5. If you customized your installation, you may not have all of the fonts listed below. If you installed Mac OS X 10.5 over a previous version of Mac OS X, you may have additional fonts installed.

This is a list of all font files that come with Mac OS X 10.5, and their version numbers.

Package: Essential System Software

Installed: Always (cannot be disabled)

Location: /System/Library/Fonts
